

Title:	Connecting a Hydro-Mix V sensor to a Hydro-Control IV
Document reference (DRC):	EN0041 Rev. 1.0.0
Last updated:	22-Jan-2004
Products affected:	Hydro-Mix V, Hydro-Control IV
Summary:	Using external power source when connecting a Hydro-Mix V sensor to a Hydro-Control IV

## 1 INTRODUCTION

In some installations it has been found that the power supply from the Hydro-Control IV is not adequate to ensure a reliable signal from the Hydro-Mix V sensor and so we recommend in any new installation, or when replacing a Hydro-Mix IV sensor and connecting a Hydro-Control IV with a Hydro-Mix V a separate 24VDC power supply is used to provide power to the sensor.
